H Line Stations

METRO H Line stations

This section contains links to individual station concepts for each of the recommended METRO H Line station locations. This plan defines two core station components: the station intersection and the location of platforms within the intersection. Other preliminary design details are provided for additional context but are **conceptual and will be finalized during the engineering phase of the project.**

The individual station concepts are organized west to east, beginning in downtown Minneapolis and continuing to the east side of St. Paul. The plan identifies 46 stations over a 17-mile corridor. The Recommended Corridor Plan includes additional detail, such as considerations for each recommended station and details about typical stations and platforms.
